Sales Operations & AI Integration Specialist

AI Sales Ops Lab

1. Teca Bot Lite (24/7 AI Consulting Assistant)

Gemini API | FastAPI | Render Deployment

A lightweight, autonomous AI agent designed to handle initial customer inquiries, qualify leads, and collect contact information outside of business hours.

- **Always On:** Provides immediate responses to customer questions 24/7 based on a predefined knowledge base (e.g., Lumi English center).
- **Lead Qualification:** Identifies high-intent customers and smoothly requests phone numbers for the human sales team.
- **Seamless Handoff:** Syncs collected leads directly into the CRM (Google Sheets) via API.

2. Lightweight AI-Powered CRM

Google Sheets | Apps Script | Data Analysis

A customized CRM built on Google Sheets that automatically aggregates data from marketing channels and AI bots, providing real-time performance insights.

- **Automated Data Entry:** Connects with Webhooks/FastAPI to instantly log new leads.
- **Smart Allocation:** Uses predefined rules to assign leads to appropriate sales consultants based on performance metrics and workload.
- **Performance Dashboard:** Visualizes conversion rates, contact success rates, and revenue targets.

3. Personal Finance AI Assistant

AI Agent | Commission Calculation | LLM Context

An internal tool built for sales professionals to track their personal revenue targets, calculate complex commission structures, and manage operational costs.

- **Dynamic Calculation:** Understands multi-tiered commission policies.
- **Target Tracking:** Helps sales staff monitor their progress towards monthly quotas in real-time.
- **Conversational Interface:** Allows users to ask "How much more do I need to sell to reach the 15% tier?" and receive accurate answers based on their current data.
